Experiment 3: Emerging Trends in Low-Code Development For Job Application Form

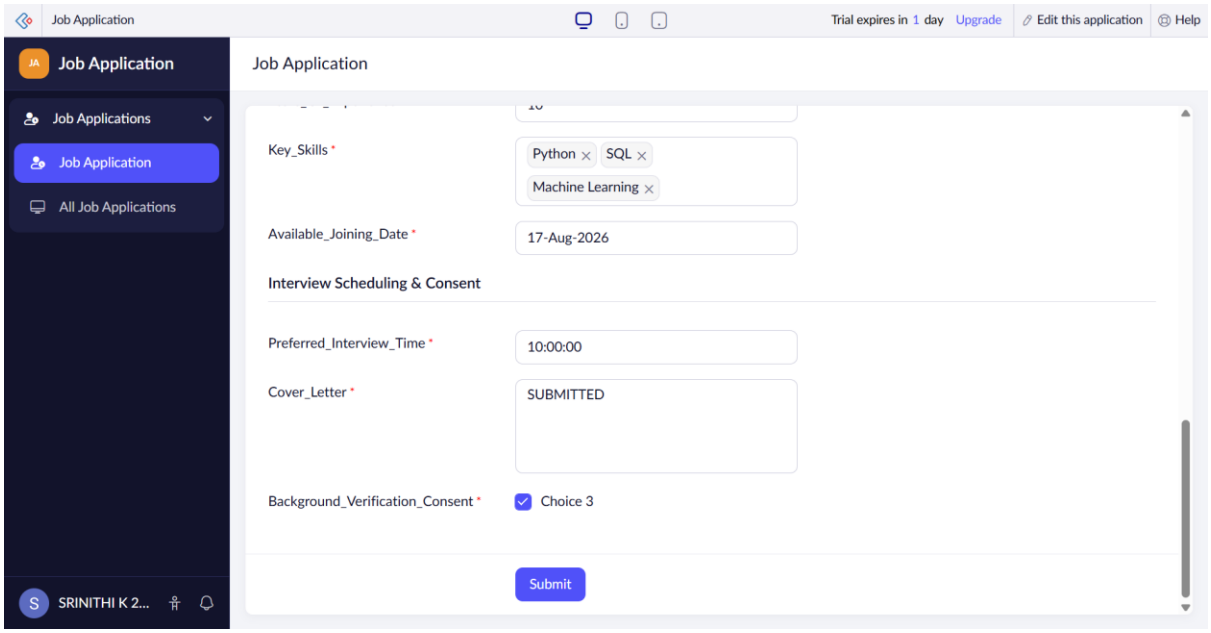

Aim

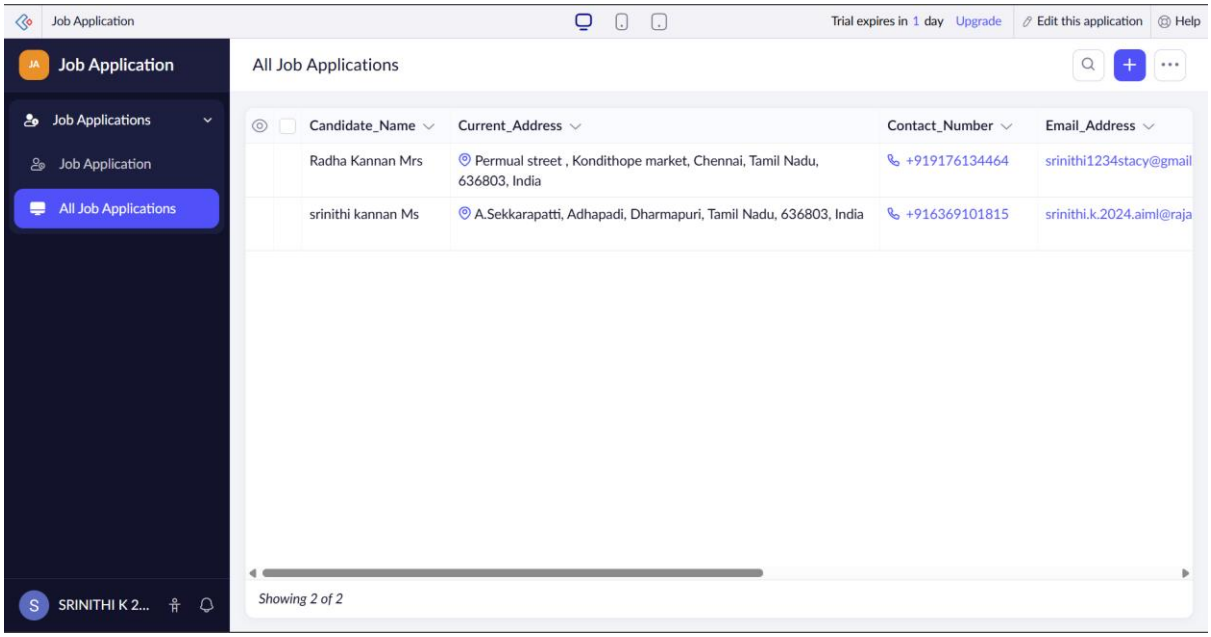

To study the emerging trends in low-code development by building a Job Application Form using Zoho Creator.

SCREENSHOTS:

Observation

Low-code platforms like Zoho Creator enable rapid application development with drag-and-drop tools, built-in validations, and automated reports, reducing development time.

Result

The emerging features of low-code development were studied successfully through the implementation of the **Job Application Form** in Zoho Creator.
