Reports, Dashboards, and UI Builder

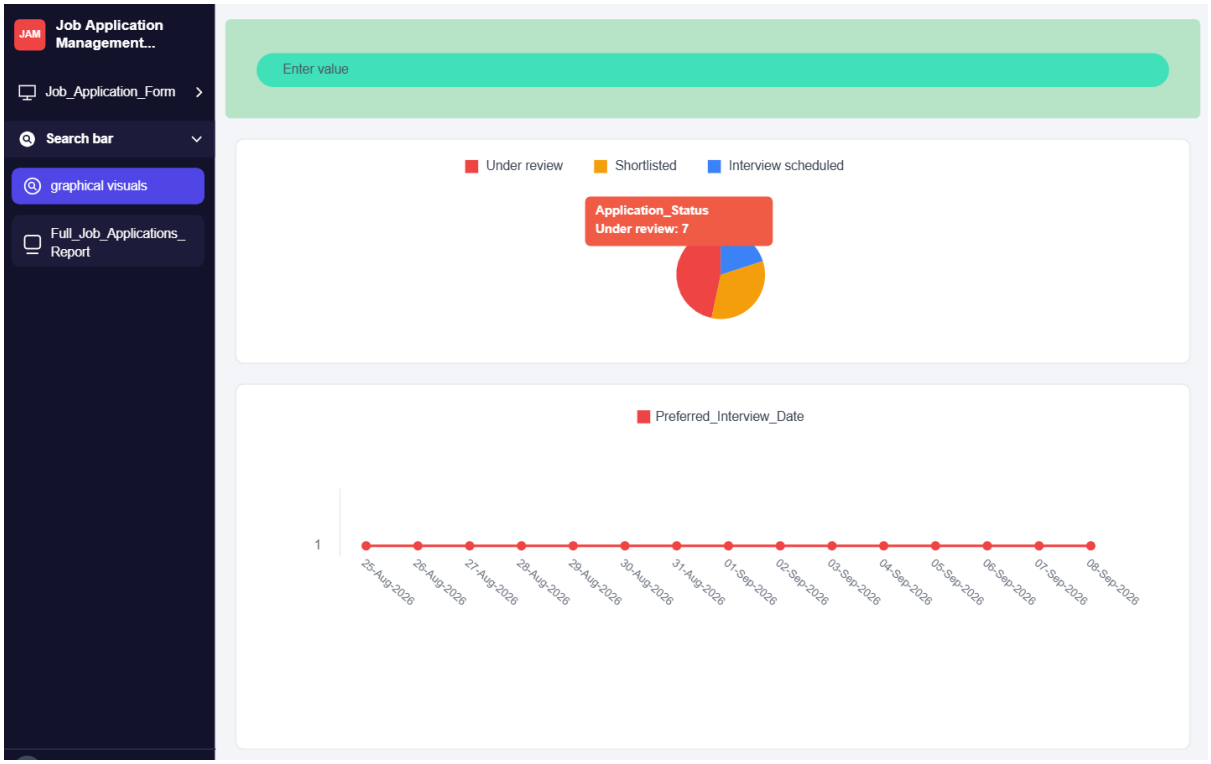

Aim

To create and configure Reports, Dashboards, and UI Builder pages in Zoho Creator for the Job Application Management system to organize, analyze, and present application data effectively through interactive user interfaces.

SCREENSHORTS:

Observation

A Job Application system was created in Zoho Creator. Reports were generated to display candidate records, dashboards were created using charts and KPIs for data visualization, and a UI Builder page was designed with forms, reports, and navigation components for better user interaction.

Result

Thus, Reports, Dashboards, and UI Builder were successfully created in Zoho Creator for efficient data management and visualization of job application records.
