# User Management and Role-Based Access Control for JOB APPLICATION

## Aim

To implement User Management and Role-Based Access Control (RBAC) in Zoho Creator to control user permissions and provide secure access to application components based on user roles.

**SCREENSHOTS**:

## Observation

Users and roles were created in Zoho Creator, and access permissions were configured to control the availability of forms, reports, and pages based on user roles.

**Result**

Thus, User Management and Role-Based Access Control were successfully implemented in Zoho Creator, ensuring secure application usage by providing appropriate access permissions based on user roles.
