Zoho Creator API Integration for Job Application

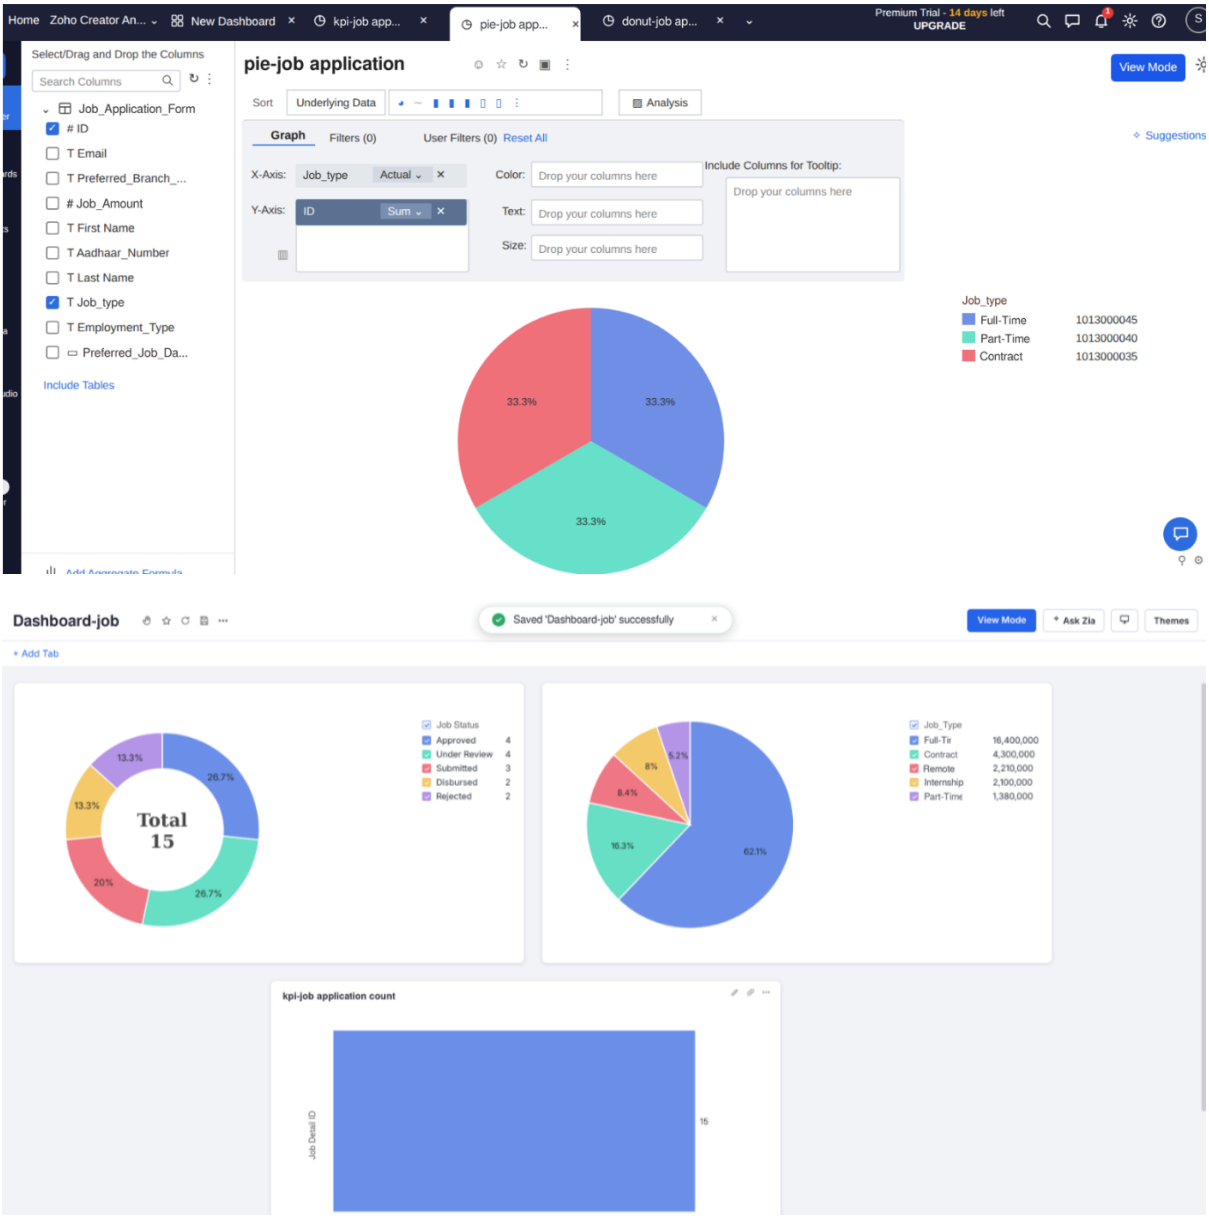

Aim

To integrate Zoho Creator with external applications using API and Deluge scripting for automated data exchange and efficient application management.

SCREENSHOTS:

Observation

API integration was implemented in Zoho Creator using Deluge scripts. Data was automatically transferred between forms/applications through API calls, reducing manual data entry and enabling automated communication between systems.

Result

Thus, Zoho Creator API Integration was successfully implemented, allowing automated data transfer and interaction between Zoho Creator and external applications using APIs and Deluge scripts.
